## SUMMARY

---

**Enthusiastic and result-driven Full-Stack Software Developer** with a solid grasp of multiple languages and software. **Expert in full-stack development** with primal focus on **back-end development**. **Drive application scalability, security, and robustness** through best development practices. Excel in **collaborative and innovative environments**. **Eager to learn and savvy on a deep understanding** of computer science, software engineering, programming languages, and software for best development practices.

## SKILLS

---

PHP | Java | Spring | JavaScript | Next.js | React.js | Tailwind CSS | MySQL | Docker | Git | API Development | RESTful Services | Debugging & Optimization | Agile Methodologies | Microservices | Test-Driven Development

## EXPERIENCE

---

<b>Software Developer</b>	SMMILE Digital, Pte. Ltd.	Oct 2023 - Feb 2025
---------------------------	---------------------------	---------------------

- **Maintained and further enhanced SmartZhongYi**, a healthcare enterprise full-stack application, allowing **better security with ISO standard and serving the requirements that clients suggested**.
- **Optimized database queries, configuration, application algorithm, and APIs**, resulting in **reduced processing time by 50%**. This increased application performance and much better user experience.
- **Innovated SmartZhongYi Patient Portal** in response to the problem: "How to improve SmartZhongYi patients' experience with the clinic".

<b>Software Developer Intern</b>	SMMILE Digital, Pte. Ltd.	Jul 2023 - Sept 2023
----------------------------------	---------------------------	----------------------

- **Maintained and fixed bugs** across different versions of **SmartZhongYi Applications**, ensuring that the **system is running consistently and preventing problems from occurring**.
- **Designed and optimized WordPress Websites**, thus **increasing websites SEO and visibility**.
- **Researched and integrated new tech stack** to the company, that allows future use of **Next.js** and **Docker** to **SmartZhongYi**

## EDUCATION

---

<b>BS, Computer Science</b>	University of Roehampton, UK	Feb 2025 - Feb 2027
-----------------------------	------------------------------	---------------------

<b>HND, Software Engineering</b>	Lithan Academy, Singapore	Jun 2022 - Dec 2024
----------------------------------	---------------------------	---------------------

- **A sole graduate out of 35 software engineering students** (BDSE-0622 cohort), thus demonstrating my **resilience and dedication to my studies**.
- **Developed** different **full-stack application projects** (Jump Start), **Networking Projects** (Swift & Bacon Publishers), and **Data Science** (HelloGreen Attrition), thus allowing to have a solid grasp in software engineering and related computer science domain.

## VOLUNTEER

---

<b>Library Users Tracking Application</b>	Sister of Mary School- Boystown, Inc., Philippines
---	--

- **Volunteered** to develop a Library Users Tracking Application System, thus **reducing paper consumption to zero and increased accuracy in record tracking**.
- **Demonstrated initiative and problem-solving skills**, by making an impact on real world institutions and problems.
